

BLINDTEK DESIGNER SYSTEMS

Solutions to Match Your Imagination

ABOUT US

We offer a wide range of the most technologically advanced motorized shading systems.

Blindtek Designer Systems originated as a high-end retail establishment in Scarsdale, NY **back in 1982**. Since then, it has transformed into a nationally and internationally acclaimed designer and installer of both interior and exterior specialty shading systems. BDS proudly provides comprehensive services for designers, architects, and general contractors -- offering everything from standard shades to bespoke, one-of-a-kind creations. With over 40 years of experience, our in-house team of shading experts can bring your vision to life.

PROJECT MANAGEMENT

BDS is a step above the competition in project management and client satisfaction. We provide trained project managers, the latest in advanced technology, and applications with unparalleled global resources for your unique project.

SERVICING

We are a service-centric company. Every systems is built with our nationally recognized service in mind. Our relationship with our customers lasts well beyond project completion and is the reason we have so many satisfied, loyal customers.

TECHNICAL DRAWINGS

The BDS business model is full-service. We have in-house professionals at our disposal to ensure precision of design and execution. Our shading engineers are specially trained in Europe to be at the forefront of the industry and CAD execution.

SOLUTIONS

Exterior Shading

Our production portfolio offers a wide variety of exterior shading options that suit any design perspective. We proudly install awnings, pergolas, sun sails, louvred rooves, zipper shades and more. Maximize your outdoor living space with a custom solution tailored to your lifestyle.

EXTERIOR SHADING

Awnings

BDS offers a diverse range of awning systems from our network of multiple manufacturing partners including, but not limited to: **Markilux®**, **Brustor®**, **Llaza®**, **Eclipse®** and several more.

Manufactured in Europe and domestically, these systems are made with only the highest quality materials and are built to last with award-winning designs.

Some of the most popular fabric structure coverings that we offer include full cassette awnings, semi-cassettes, and open-cassettes, as well as the Planet, and the Syncra.

Pergolas

BDS proudly offers a variety of pergola systems to fit every need and price point from multiple brand partners. We work with companies that are globally recognized for their use of cutting-edge technology and versatile designs.

As the largest Premium Ambassador and the first **Renson**® dealer in the United States, we stand behind the quality of their products with confidence.

Our brand offerings include, but are not limited to:

EXTERIOR SHADING

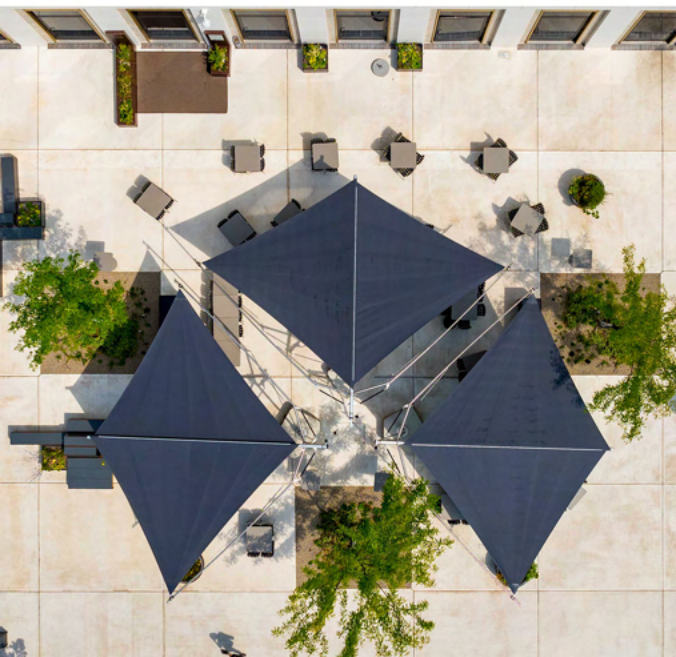

Sun Sails

BDS proudly offers a variety of fold & roll sun sails from our partners, **SunSquare®** and **Soliday®**.

In 2021, our team installed seven motorized fold-and-roll sail shades from **SunSquare®** at Little Island Park in New York City.

With 270 degree twistability, these sunshades are intelligently designed with your comfort and safety in mind. For example, in strong winds, the arm system will automatically fold in and to curl up the sail.

These impressive shades featuring motors from **Somfy®** and Soltis 92 fabric from **Serge Ferrari®** add to the iconic landscape of the park. The unique challenge of having them mobile and under line voltage power is another example of Blindtek Designer Systems' experience and design ingenuity.

EXTERIOR SHADING

Zippered Shades

Zippered shades fit almost any rectangular opening and can be installed in new or pre-existing structures. This technology holds the fabric under constant tension between two opposing side channels at all times and can be applied to many types of shades including top down, bottom up, inclined or horizontal.

We also offer ScreenaMax zip screens courtesy of our sister company, **Specialized Shading Systems**[®]. These shades can span up to 23' wide and roll out perfectly flat thanks to **ZOOMTECH**[®] the award-winning zero deflection technology from **Bematech**[®].

Solar

Available in a variety of solar screen fabrics and colors. These shades are designed to let in some light while reducing glare and heat gain.

Blackout

Alternatively, no-light fabric will create true blackout. This option provides complete privacy at the touch of a button.

Insect

This fabric option provides protection from pesky insects while you enjoy your outdoor living space.

SOLUTIONS

Interior Shading

Our team of experts can create the perfect interior shading solution for your lifestyle. We are pleased to offer you custom options for everything from motorized roller shades to solar roman skylight systems and more. Transform any indoor living space with the help of Blindtek Designer Systems.

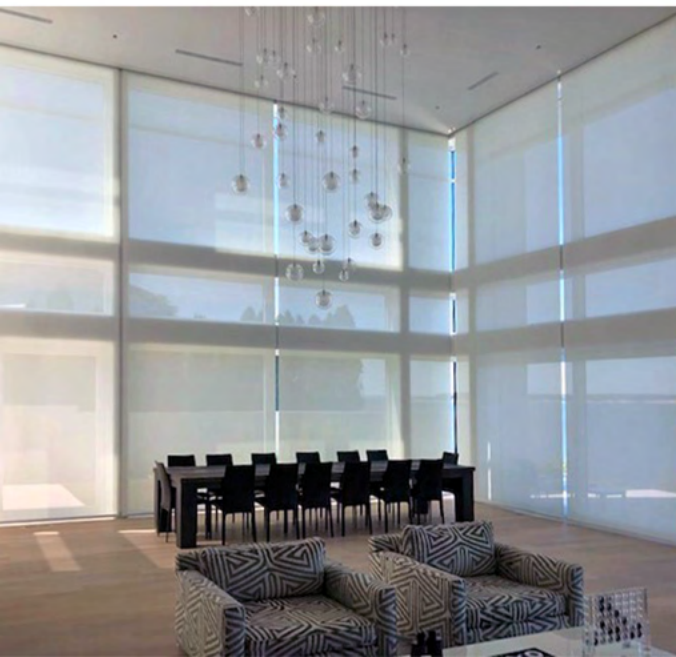

INTERIOR SHADING

Roller Shades

Motorized roller shades are window treatments that combine functionality with modern technology to provide convenient and efficient light control.

These shades are operated by an electric motor, allowing users to raise or lower them with the touch of a button, remote control, or through smart home systems. Motorized roller shades are ideal for both residential and commercial spaces, offering a sleek and minimalist design that complements any style.

Available in a variety of fabrics and colors, they provide excellent control over natural light, privacy, and energy efficiency, while being particularly beneficial for hard-to-reach windows or for creating a seamless, automated experience.

INTERIOR SHADING

Solar Romans

Our solar roman shades can be used in a variety of applications that are both functional and aesthetically pleasing. From horizontal skylights to conservatories and sloping windows, these shades never fail to visually impress.

Solar roman shades are suitable for a variety of applications including sloping, horizontal, bottom up, and radial.

Our partnership with **Goelst International**[®] allows us to offer drapery track systems with unparalleled quality and elegance, perfect for use in both residential and commercial spaces.

Thanks to their 6200 motorized track system, we can offer you extra-large horizontal roman shades spanning up to 20' wide and 82' long.

INTERIOR SHADING

Skylight Shades

Motorized skylight shades have the ability to enhance any space by controlling natural light and privacy without sacrificing style. Whether it's for residential or commercial applications, our team can provide custom shading solutions for skylights and sloping windows of almost any shape or size.

We regularly incorporate TESS systems from our partner **Guthrie Douglas**® into our skylight shading projects. With the ability to run in any direction and at any angle, say goodbye to harsh glares and hello to perfect lighting control!

Available in a variety of fabric options, including solar and blackout materials, you can tailor the ambiance to your preference. These shades also provide energy efficiency by minimizing heat gain; ensuring comfort throughout the year. Easy to operate and aesthetically pleasing, these motorized skylight shades can be the perfect solution for transforming sunlight into a beautifully managed feature of your space.

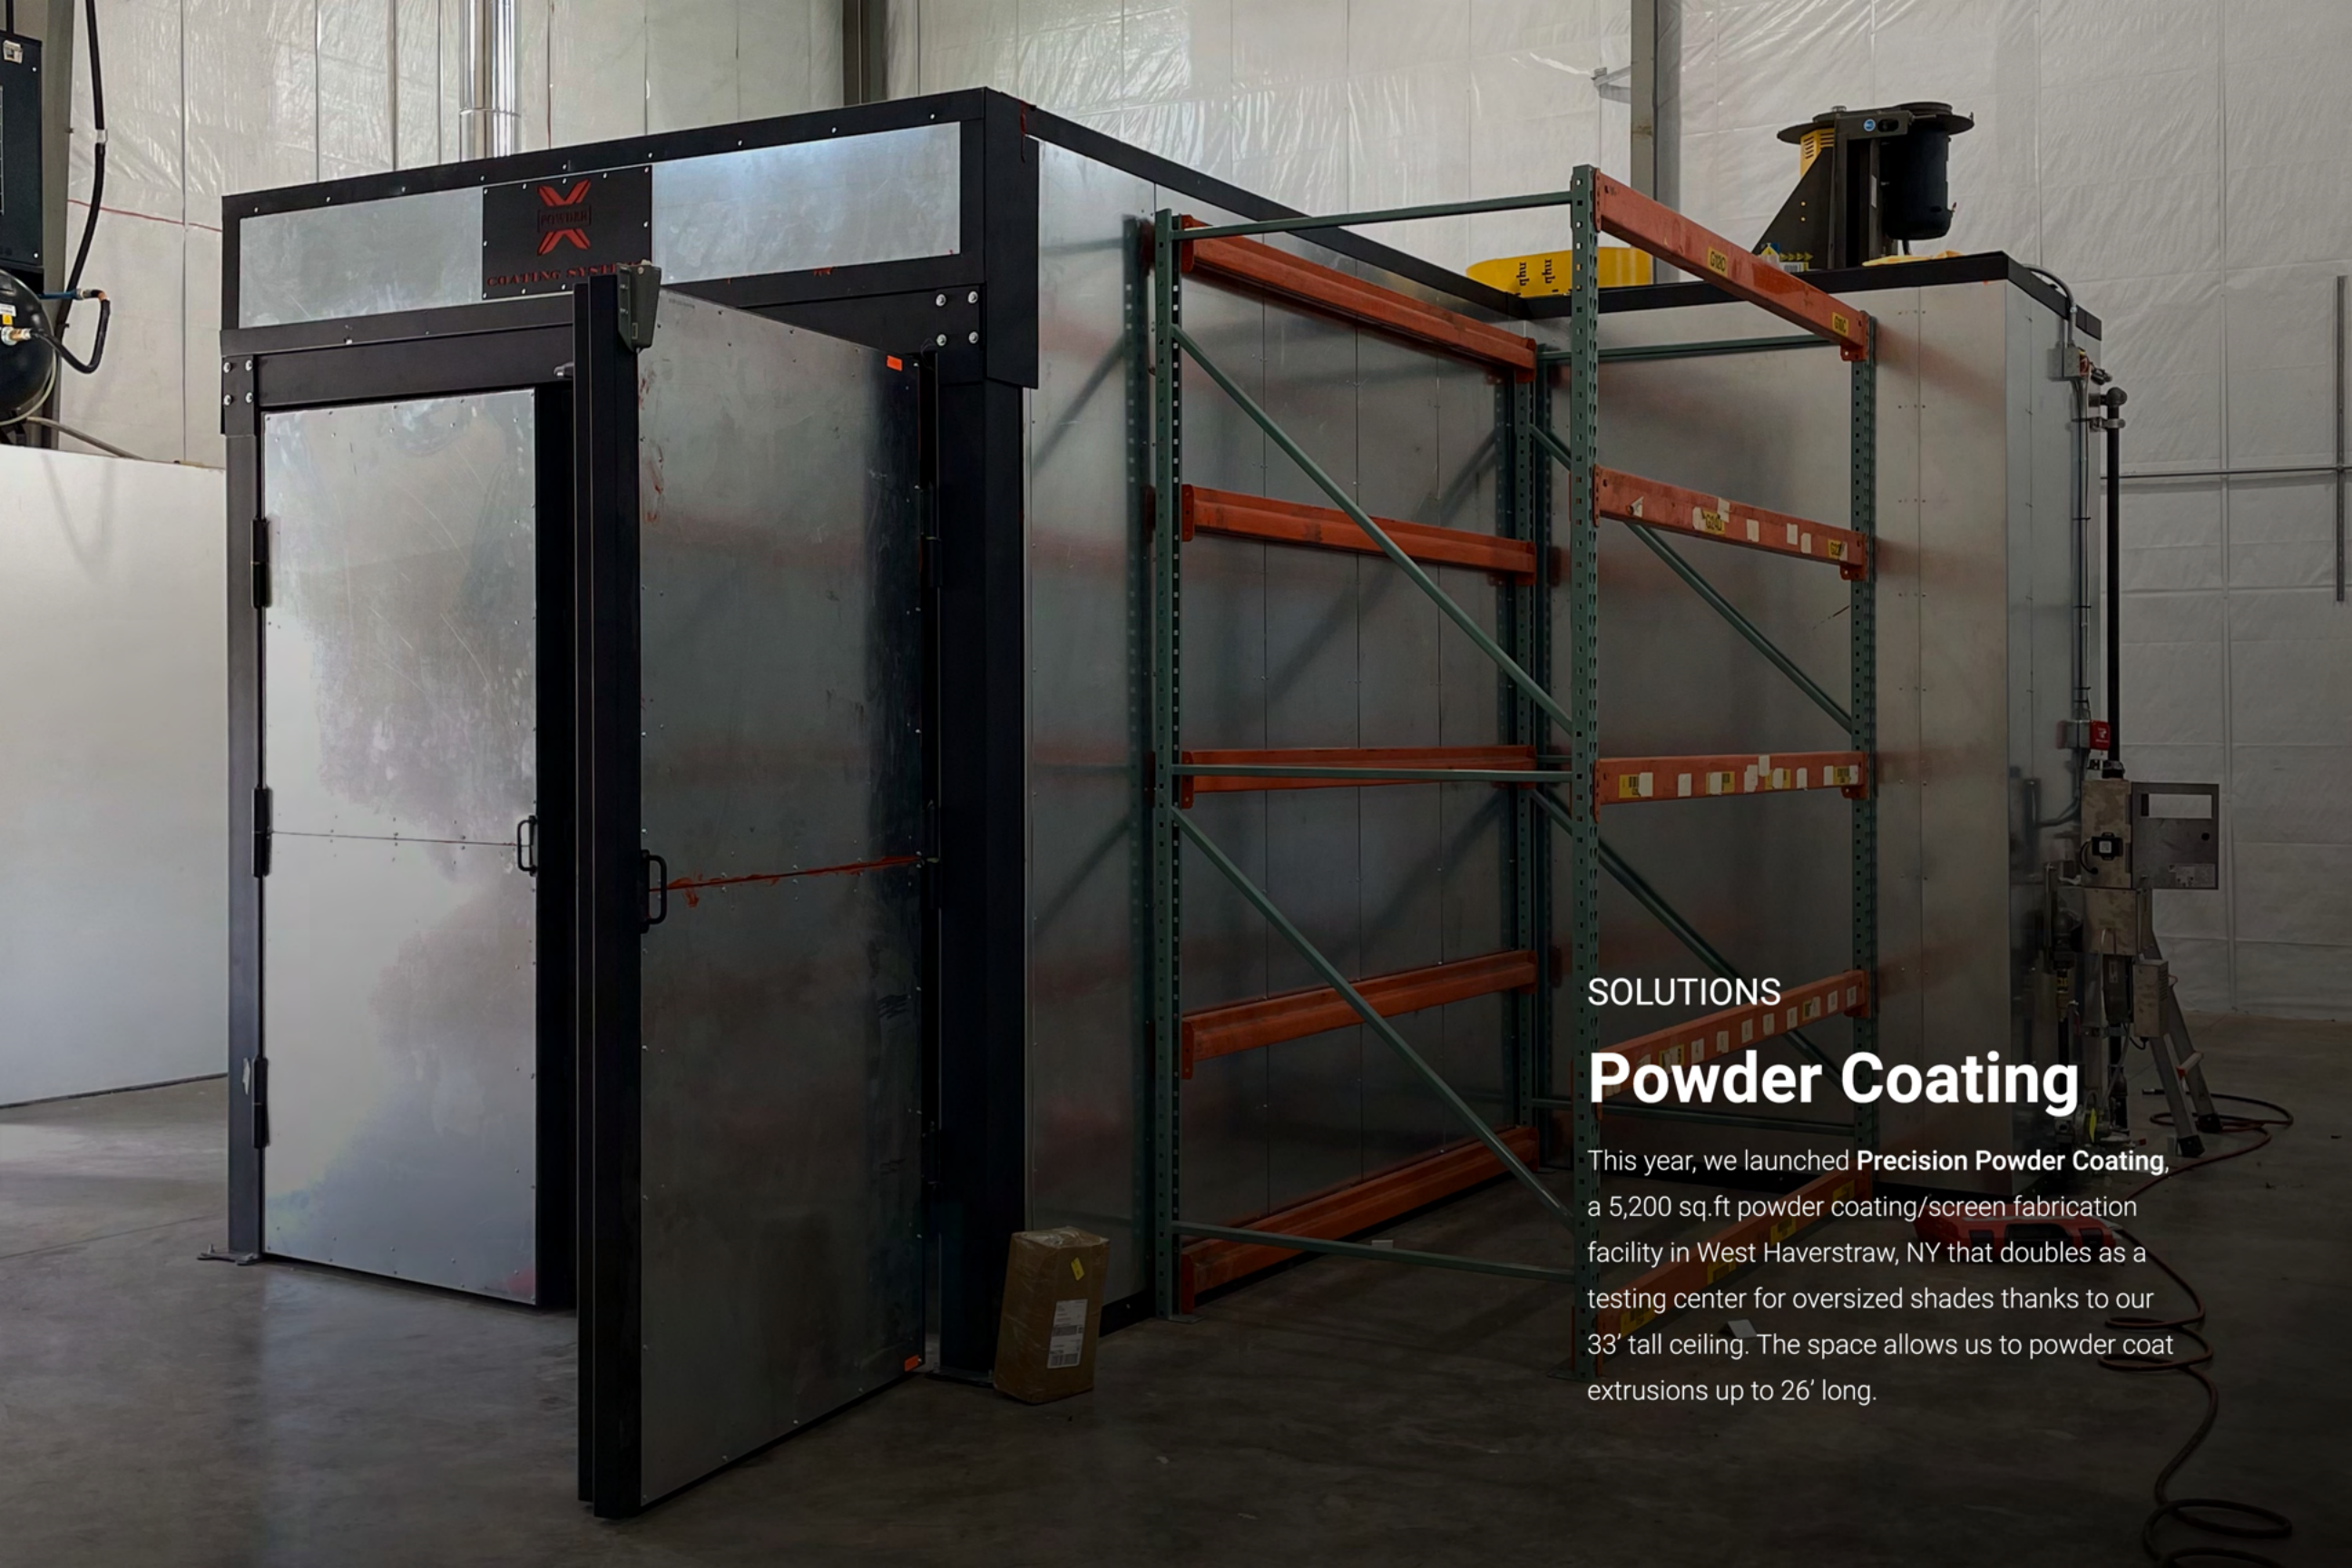

INTERIOR SHADING

Specialty Shapes

Our team of shading specialists offer bespoke shading solutions for windows of almost any shape or size. Whether your windows are **trapezoidal**, **triangular** or **arched**, we have the expertise to design a system that fits perfectly without compromising your view.

Our personalized approach ensures that each unique window is complemented with a shading solution that enhances both aesthetics and functionality -- providing optimal lighting control, privacy, and energy efficiency.

SOLUTIONS

Powder Coating

This year, we launched **Precision Powder Coating**, a 5,200 sq.ft powder coating/screen fabrication facility in West Haverstraw, NY that doubles as a testing center for oversized shades thanks to our 33' tall ceiling. The space allows us to powder coat extrusions up to 26' long.
